

March 1, 2024

To Whom it May Concern,

I am honored to recognize Shazaib Kashif as an official RISC-V Advocate. Advocates are RISC-V enthusiasts who work together with RISC-V International to ensure global momentum and adoption. They are expected to be a contact for their local region, host local events, engage the community through blog posts and speaking opportunities and have passed the RISC-V Foundational Associate Certification exam. This recognition is given to only 8 individuals since its inception in 2024. We are very proud of our advocates and are confident that they will go far with their RISC-V Contributions.

RISC-V International is a non-profit organization incorporated in Zurich Switzerland. We have a global membership across 70 different countries with over 4.2k members. We are the home of the RISC-V Instruction Set Architecture (ISA), related specifications, and stakeholder community. Our members collaborate to define RISC-V open specifications as well as convene and govern related technical, industry, domain, and special interest groups.

We are very proud to acknowledge the hard work of our RISC-V Advocates!

Sincerely,

A handwritten signature in black ink that reads 'Calista Redmond'.

Calista Redmond
